

## Table of Contents

List of legislation referred to	VIII	<b>3 Managing public conservation land</b>	31
List of abbreviations and acronyms	IX	Public conservation land	34
List of tables and figures	IX	A dedicated national agency	35
Foreword	X	Statutory role	35
Preface	XI	Conservation Act 1987	35
Acknowledgements	XII	Wildlife Act 1953	36
		Working with Māori	37
<b>1 The story so far</b>	1	Advocacy role	37
Overview	2	Transforming conservation science	39
The importance of biodiversity	4	Progress made against key challenges	41
Historic biodiversity loss in New Zealand	4	Funding mismatch	42
Impacts of human settlement	5	Prioritisation	43
Responses to biodiversity loss	7	Conservation performance reporting	44
Convention on Biological Diversity	7	Partnerships approach	45
New Zealand Biodiversity Strategy	8	Key conclusions and a way forward	48
Domestic legislation	9		
Terrestrial biodiversity	9	<b>4 Protecting biodiversity on private land</b>	51
Freshwater biodiversity	13	Importance of private land for biodiversity	53
Marine biodiversity	14	Landowners	53
Agencies and biodiversity protection	16	RMA and biodiversity	53
Modern losses – the decline of biodiversity is continuing	18	Role of regional and local councils	54
		Role of Māori	55
<b>2 Drivers of biodiversity loss and a framework to address them</b>	21	Regional and district planning instruments	56
Key drivers	22	Integration	56
Markets not valuing biodiversity	23	Role of national guidance	57
Weak regulation	24	Assessing significance	59
Weak public pressure for conservation	24	Resourcing	59
Implications for biodiversity management	25	Assessment	60
Ambiguous and disjointed regulation	25	Methods to protect identified areas	61
Poor institutional alignment	26	Weaknesses of approach	61
Slow or lax enforcement	26	Resource consents and mitigating harm	61
Fragmented biodiversity information	27	Mitigation of ecological harm	61
Inadequate monitoring and reporting	27	Compliance and monitoring	62
A framework for solutions	27	Species protection on private land	63
Strategic initiatives	28	Covenanting over private land	64
Tactical initiatives	29	Covenanting tools	66
Practical initiatives	30	Protecting biodiversity values through covenants	67
Solid but insufficient progress	30	Non-regulatory methods	68
		State of biodiversity reporting	69
		Pressure-state-response framework	70

Sources of information	71	Improving marine protection	116
Key conclusions and a way forward	71	Collaboration in the marine space	117
<b>5 Safeguarding freshwater biodiversity</b>	75	Key conclusions and a way forward	118
New Zealand's freshwater biodiversity	76	<b>7 Supporting community conservation</b>	121
History of freshwater ecosystem degradation	77	What is community conservation?	122
Economic significance of freshwater systems	79	Growth of community conservation in New Zealand	123
Integrated freshwater management	79	Citizen science: community involvement in	
Key agency responsibilities	79	biodiversity monitoring	126
Department of Conservation	80	The contribution of community conservation	126
Fish and Game Councils	80	Sources of funding for community conservation	130
Ministry for Primary Industries	82	Does community conservation diminish the collective	
Regional and local councils	82	action problem?	131
Protection measures for freshwater biodiversity	83	Key conclusions and a way forward	133
Site protection	83	<b>8 Finding solutions</b>	137
Species protection	84	Synthesis of observations	138
Monitoring and describing freshwater biodiversity	84	Chapter 3: Managing public conservation land	138
Proximal drivers of freshwater biodiversity loss	85	Chapter 4: Protecting biodiversity on private land	138
Overexploitation	85	Chapter 5: Safeguarding freshwater biodiversity	139
Point-source pollution	87	Chapter 6: Protecting marine biodiversity	139
Nonpoint source pollution	88	Chapter 7: Supporting community conservation	139
Flow modification	88	Framework for solutions revisited	139
Degradation and destruction of habitat	89	Strategic solutions	143
Invasion by exotic species	91	S1 Partnerships	143
Collaborative change	92	S2 Environmental protection fund	144
National Policy Statement on Freshwater Management	92	S3 Environmental consumption tax	146
National Objectives Framework	92	S4 National conversation on biodiversity	147
Improving the policy framework	93	S5 Payments for ecosystem services	148
Key conclusions and a way forward	94	Tactical solutions	149
<b>6 Protecting marine biodiversity</b>	101	T1 Improve threatened species legislation	149
New Zealand's marine environment – what do we know?	103	T2 Key threatening processes regime	150
Threats to the marine environment	104	T3 Increase core funding for the Department of Conservation	151
Funding marine conservation	106	T4 Mandatory national-level state of biodiversity reporting	152
Controlling access to the marine environment	107	T5 Provide for the Māori world view	152
Regulation of environmental effects of activities	108	T6 Policy for mitigation of ecological harm	153
Fisheries management	109	T7 Market tools for biodiversity conservation	154
Impact of fishing on biodiversity	111	T8 Regional biodiversity planning	155
Regulatory capture	113	T9 Biodiversity guidance to regional councils	156
Regulation for the protection of marine biodiversity	113	T10 Hold agencies accountable for outcomes	156
Protection of marine species	113	T11 Improve compliance and enforcement	158
Spatial protection of marine habitat	115	T12 Expand tools for private land protection	158
Māori-specific marine protection	116	T13 Improve covenant management	160

T14 Support landowners to undertake conservation	162
T15 Strengthen the Freshwater NPS	163
T16 Deploy tools to protect freshwater ecosystems	164
T17 Close policy gaps for wetlands and estuaries	165
T18 Reform marine law and policy	165
T19 Allocate stewardship land	166
T20 Strengthen public interest litigation	167
Practical solutions	168
P1 Improve conservation methods	168
P2 Improve pest control methods	168
P3 Improve biodiversity information	170
P4 Ensure access to biodiversity data	171
<b>9 Summary and vision</b>	175
Vision	176
So how do we achieve this vision?	177
Funding for conservation	177
Alignment of divergent interests	178
Public mobilisation to elicit leadership and vision	179
Accountability and monitoring	179
Effective legislation, implemented well	180
Fighting on the front line	180
From here on in – a pathway for change	181
