

CONTENTS

iv	Foreword	19	THREE – COASTAL MANAGEMENT
v	Preface	20	Introduction
vi	Acknowledgements	21	Coastal managers
vii	Contents	21	Minister and Department of Conservation
1	PART ONE	21	Minister and Ministry for the Environment
3	ONE - INTRODUCTION TO THE COAST	22	Regional councils
4	What is the coast?	22	Territorial authorities
5	Physical shaping of the coast	23	Iwi authorities and groups holding customary marine title
5	Volcanic coastal features	24	Statutory Principles
5	Tectonic coastal features	24	Resource Management Act 1991
5	Effects of sea-level change	25	New Zealand Coastal Policy Statement 2010
5	Coastal processes	25	Hauraki Gulf Marine Park Act 2000
6	Types of environments within the coastal margin	25	Marine and Coastal Area (Takutai Moana) Act 2011
6	Duneland systems	27	Coastal management tools
6	Estuaries	27	Resource Management Act policy statements and plans
7	Wetlands	27	Resource consents
7	Rocky coasts	28	Other mechanisms
8	The impact of a changing future climate	29	References and further reading
8	Ownership of the coast	31	FOUR – COASTAL POLICY
9	Why is the coast so special?	32	The New Zealand Coastal Policy Statement 2010
10	References and further reading	33	Structure of the document
11	TWO – COASTAL LAND DEVELOPMENT	33	How the NZCPS 2010 differs from the NZCPS 1994
12	Introduction	35	Defining the extent of the coastal environment
13	Redevelopment of existing coastal settlements	36	Other important matters
14	Expansion of coastal settlements	36	Taking a precautionary approach
14	Establishment of new coastal settlements	36	Avoiding adverse effects
15	Rural-residential coastal development	37	Integration
16	Canal estates	38	Activities
17	Summary of impacts from different coastal land development models in New Zealand	40	Strategic planning
18	References and further reading	41	What the NZCPS 2010 means for planning documents and resource consents decisions
		42	References and further reading

CONTENTS (continued)

43	PART TWO		
45	FIVE – PRESERVING NATURAL CHARACTER		
46	Introduction		
47	Vision		
47	Issues		
48	Policy		
48	Defining natural character		
49	Assessing natural character		
50	Preserving natural character		
53	Restoring natural character		
55	Best practice design elements		
55	Retain natural landforms		
56	Avoid visually-intrusive structures		
57	Enhance native coastal vegetation		
58	Maintain natural coastal processes		
59	Best practice planning elements		
59	Identify areas with outstanding and high natural character		
60	Restrict subdivision and development in areas with outstanding and high natural character		
61	Provide appropriate objectives, policies and rules to address impacts on other natural character		
62	Control development in highly modified areas		
63	Promote restoration efforts		
64	References and further reading		
65	SIX – PROTECTING LANDSCAPE AND AMENITY VALUES		
66	Introduction		
67	Vision		
67	Issues		
68	Policy		
68	Defining landscape		
68	Assessing landscape		
69	Protection and management of landscapes		
71	Best practice design elements		
71	Avoid buildings and structures in outstanding and sensitive areas		
72	Locate and design buildings to reduce their landscape impacts		
73	Set, retain and restore generous setbacks		
74	Restore natural vegetation and systems		
75	Permanently protect valuable landscape and amenity areas		
76	Best practice planning elements		
76	Identify outstanding natural coastal landscapes and amenity values		
77	Develop appropriate objectives and policies to protect landscape and amenity values		
78	Develop rules and consent conditions to control coastal subdivision		
79	Develop rules which sufficiently control landscape impacts arising from developments		
80	References and further reading		
81	SEVEN – ADDRESSING SEDIMENTATION AND POLLUTION		
82	Introduction		
83	Vision		
83	Issues		
85	Policy		
85	Enhancement of water quality		
86	Managing sedimentation		
86	Reducing the discharge of contaminants		
88	Best practice design elements		
88	Incorporate sediment retention mechanisms into earthworks		
89	Consider use of forward planning and cutting edge technologies		
90	Reduce runoff from urban activities		
91	Reduce runoff from agricultural activities		
92	Reduce runoff from forestry activities		
93	Best practice planning elements		
93	Undertake a wider assessment of sedimentation issue		

94	Control land-based activities that can generate increased levels of sediment and pollution	121	Policy
95	Control generation and disposal of stormwater and sewage	121	Identification of coastal hazards
96	Control generation of sediment and pollution from marine-based activities	122	New development
97	Support the use of other methods and tools	122	Redevelopment
98	References and further reading	122	Significant existing development
99	EIGHT – PROTECTING COASTAL BIODIVERSITY	123	Natural defences
100	Introduction	124	Hard protection structures
101	Vision	124	Management approaches
102	Issues	124	Managed retreat
102	Policy	125	Adaptation
102	Protection of biodiversity	125	Soft protection
105	Restoration of biodiversity	125	Hard protection
106	Best practice design elements	126	Best practice design elements
106	Create and restore vegetated buffer areas	126	Provide a generous coastal buffer
107	Prohibit domestic pets in subdivisions near sensitive coastal areas	127	Avoid adverse impacts on natural defence systems
108	Provide for restoration of coastal forest	128	Use sympathetic designs for protection structures
109	Permanently protect important biodiverse areas	129	Best practice planning elements
110	Best practice planning elements	129	Identify coastal hazards and assess coastal hazard risks
110	Identify significant natural ecosystems and sites of biological importance	130	Map coastal hazard zones
111	Identify locations where certain activities are inappropriate	131	Incorporate climate change standards into regional policy and plans
112	Develop appropriate objectives, policies and methods (both statutory and non-statutory) to protect coastal biodiversity	132	Set appropriate zoning and activity classification
114	Set accompanying rules and consent conditions to control coastal subdivision	133	Set appropriate classification for hard protection works
115	References and further reading	134	References and further reading
117	NINE – MANAGING COASTAL HAZARDS	135	TEN – MAINTAINING AND ENHANCING PUBLIC ACCESS
118	Introduction	136	Introduction
119	Vision	137	Vision
119	Issues	137	Issues
120	Current legislative regime	138	Policy
		139	Protecting public access
		140	Controlling vehicle access
		140	Protecting access to surf breaks

CONTENTS (continued)

141	Other legislation
142	Best practice design elements
142	Provide effective public access
143	Minimise encroachment into coastal reserve areas
144	Best practice planning elements
144	Map existing and future public access to the coast
145	Develop appropriate objectives, policies and rules relating to esplanade reserves
146	Develop appropriate objectives, policies and rules to restrict public access
147	Support non-statutory planning tools which promote public access to the coast
148	References and further reading
149	ELEVEN - PROTECTING MĀORI INTERESTS
150	Introduction
151	Vision
152	Issues
152	Policy
154	Use of coastal resources and exercising kaitiakitanga
154	Connections with cultural landscapes
155	Managing the relationship
156	Best practice design elements
156	Undertake a cultural impact assessment
157	Recognise and incorporate important values into development
158	Best practice planning elements
158	Identify and protect significant elements of the Māori relationship with the coast
159	Include provisions for ensuring the resource consent process promotes protection of Māori values
160	Support non-statutory planning tools which promote protection of Māori values
161	References and further reading

163	TWELVE – SAFEGUARDING HISTORIC HERITAGE
164	Introduction
165	Vision
165	Issues
166	Policy
166	Defining historic heritage
166	Protection of historic heritage
168	Integration into planning documents
169	Best practice design elements
169	Identify recorded historic sites
170	Consult early with tangata whenua
171	Protect heritage sites or values
172	Best practice planning elements
172	Schedule historic sites in planning maps
173	Protect both identified and unidentified sites
174	Provide special heritage zones
175	Offer regulatory and financial support for owners of listed properties
176	References and further reading
177	THIRTEEN – URBAN WATERFRONT DEVELOPMENT
178	Introduction
179	Vision
180	Issues
181	Policy
181	Protecting urban waterfront development
181	Maintaining water quality
181	Fostering economic activities
181	Protecting the natural environment and character
181	Providing public access
182	Approaches to management
182	Integrated coastal management

CONTENTS

182	Smart growth	206	Kapiti Coast District Council Best Practice Subdivision and Development Guide
183	New urbanism	207	References and further reading
183	Urban ecology and landscape urbanism	209	FIFTEEN – CHARACTERISTICS OF BEST PRACTICE COASTAL PLANNING
183	Progressive risk reduction	210	Introduction
184	Best practice design elements	211	How planning documents can best contribute to coastal management
184	Strengthen connections with the water	211	Identification and mapping of important areas
185	Soften the coastline	212	Strategic planning
186	Adopt low-impact design	213	Integrated planning
187	Promote mixed use and diversity	213	Resource consenting
188	Recreate the natural and historic character	214	Important elements
189	Best practice planning elements	214	Well-informed planning
189	Map out natural and historic aspects to be protected	214	Clear planning
190	Promote community involvement	214	Effective methods
191	Use strategic planning to provide the basis for resource allocation	215	Monitoring
192	Set appropriate zoning and activity classification	216	Best practice element checklist
193	Incorporate risk resilience	217	Case studies
194	References and further reading	217	Statutory planning - Draft Auckland Unitary Plan
195	PART THREE	218	Non-statutory planning - Coromandel Peninsula Blueprint
197	FOURTEEN – BEST PRACTICE DESIGN FOR COASTAL LAND DEVELOPMENTS	219	Monitoring - Whangarei District Monitoring Strategy
198	Introduction	220	Spatial planning - South East Queensland Regional Plan, Australia
199	Design process	221	References and further reading
199	Identify	223	SIXTEEN – CONCLUSIONS
199	Maintain and enhance	225	APPENDICES
200	Create	226	Appendix One – New Zealand Coastal Policy Statement
201	Best practice element checklist	243	Appendix Two - Hauraki Gulf Marine Park Act
202	Case Studies	246	Index
202	Mātauri Bay development, Northland		
203	Ōmarino development, Bay of Islands		
204	Bream Tail, Mangawhai Heads		
205	Mountain Landing, Purerua Peninsula
